

# World Wetlands Activity Sheet

The World Wetlands area of the London Wetland Centre represents 14 different global habitats and their inhabitants;

Draw a line from the birds to their homes on the map.

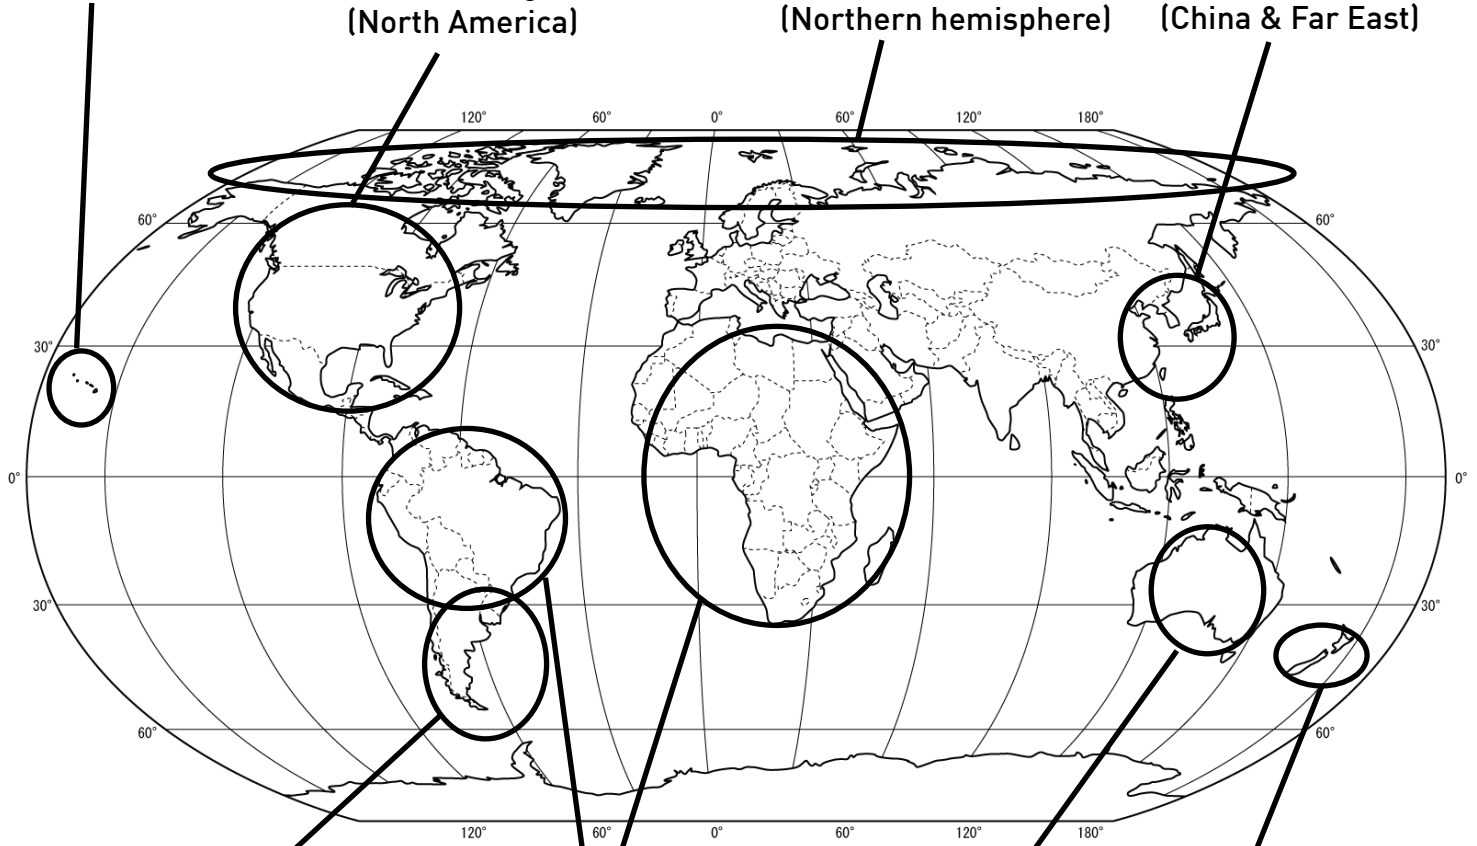

**Nene (Hawaii)**

**Hooded mergansers (North America)**

**Eider ducks (Northern hemisphere)**

**Mandarin ducks (China & Far East)**

**Black necked swan (South America & Falkland Islands)**

**White faced whistling duck (Africa + South America)**

**Maggie goose (Australia)**

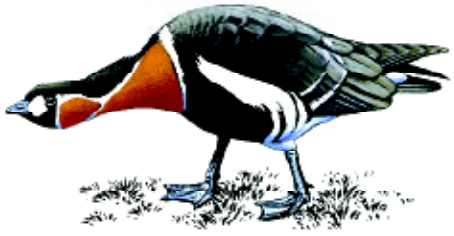

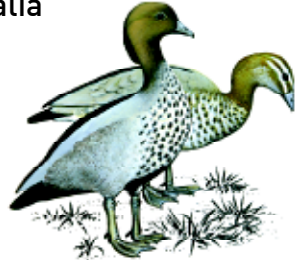

**New Zealand shoveler**

Walk around the world wetlands area and look for the pictured birds. One of the following signs of life (SOL) is found in each habitat. Look carefully in each area and see if you can fill in the table below.
